Your Number One Stud

STUD WELDING GUN Model: IWT-CA

Made in USA 

DESCRIPTION

The IWT-CA gun is designed to automatically feed C.D. weld studs up to 1.125" (30 mm) long. When used with IWT's UVF-14 universal feeder, operators can benefit from increased production rates as this system can load and weld up to 20 studs per minute (depending on stud diameter). Automatic feeding also diminishes the fatigue associated with manual loading of weld studs. The gun spring pressure can be quickly adjusted for different materials without the changing of spring or special tools. High quality horse jacket protected cables and airlines against rough surfaces. Equipped in an impact resistant housing and self-lubricating bearing, this gun will hold up to manufacturing's toughest demands.

FEATURES	IWT-CA
WELD RANGE	#6 - 1/4"
WELD CABLES	20' Of #2 Highly Flexible Welding Cable
FEED RATE	Up to 20 studs per minute, depending on fastener size
WEIGHT	2.6 LBS
